

- Great rebuild of the logo! Font looks good everywhere too
- Switch inc. to LLC. remove the copyright and all right reserved for now.
- When i open the link, before the website opens, the three stripes show up very thin, almost like three squiggles enlarged a little funny looking
- Top header with hamburger looks good
- Cool 3-D floating stripes at bottom!
- Bottom header
 - Looks funky when i collapse the page

- Can we have that fixed to this, lets stick to just two columns - group our 01-05 under one column, company and connect - and you can decide how to split the 5 under the two. Get rid of careers. the address should be for

contact, no need for biostl-cortex.

- When I hit the hamburger, I like the color tone switch. I will say the 01-05 look pretty congested and may need some left alignment (Technology) and increased spacing between each other
- I see a lot of the generated text

- For the partners and backing, if you could sub out SVB for Stifel. Keep BioSTL. Change cortex innovation district to cortex innovations community logo. Is it easy for me to move the logo panels around in team experience?
- Technology page looks good
- Team page
 - Can we slot xiaowei into the main team
- About page looks, good but did image quality go down?
- Contact x Investors page
 - In the existing light grey space just mirror the text from here <https://8vc.com/contact>
 - Instead of media inquiries, just inquiries connect@tissuelock.com
 - Our address
